INSPIRE LIGHTING

JUERIC

Inspire Lighting

Filosofía

JUERIC INVEST fundada en el 2013 por un equipo de reconocidos empresarios vinculados a la fabricación de lámparas. Desarrollamos en España las mejores soluciones lumínicas de carácter decorativo en nuestro formato DECOLED y líneas técnicas en el apartado TECHNOLED.

Somos conscientes que nuestro crecimiento pasa por ser flexibles y tener la capacidad de adaptarnos a nuevas tendencias y necesidades.

La experiencia que nos avala se hace perceptible en la nobleza de nuestros acabados, fruto de esta amplia trayectoria.

La rápida evolución de la tecnología LED nos ha llevado disponer de una acertada colección de bombillas. Gran eficacia lumínica que sigue nuestra directriz de calidad. Se puede encontrar en la sección B-LINE de este catálogo.

Empresa

Philosophy

JUERIC INVEST founded in 2013 by a team of known businessmen linked to the manufacturing of lamps. We develop in Spain the best light solutions of a decorative character in our DECOLED format and technical lines in our section TECHNOLED.

We are aware that our growth happens to be flexible and have the capacity to adapt to new trends and needs.

The Experience in this sector guarantees the quality of our products.

The quick evolution of LED technology has led us to have a successful collection of light bulbs. High luminous efficiency that follows our quality guideline. It can be found in the B-LINE section of this catalog.

GU10 System

Dentro de la iluminación técnica aplicada a hogares o negocios, encontramos una fórmula que consiste en proyectar un ángulo de luz que variará en función de las características que ofrezca la bombilla GU10.

La principal ventaja que ofrece el sistema TRACK LIGHT es el de poder crear diferentes formas a lo largo de la estancia, permite colocar el foco a lo largo del carril y de esta manera iluminar con más precisión.

JUERIC presenta unos focos de reducidas dimensiones decorados en varios acabados, que van desde la madera a colores acerados, convirtiendo estos sistemas tradicionalmente impersonales en piezas con una justificada elegancia.

Within technical lighting applied to homes or businesses, we find a formula that consists of projecting an angle of light that will vary depending on the characteristics offered by the GU10 bulb.

The main advantage offered by the TRACK LIGHT system is the ability to create different shapes throughout the room, it allows the spotlight to be placed along the track and thus, illumination is more precise.

JUERIC presents small spotlights decorated in various colors, ranging from wood to steely colors, turning these traditionally impersonal systems into pieces with justifiable elegance.

Decoled Plafonia

Denominamos PLAFONALIA a un amplia colección de plafones de carácter decorativo caracterizados por combinar estructuras de alto valor estético e innovador, montados sobre equipos electrónicos de generosa eficacia lumínica.

Incorporamos sistemas de regulación y contrastes de temperatura de luz.

Por mediación de un mando a distancia gestionamos estas funciones de una forma precisa con la posibilidad de memorizar al apagado el último estado de la luminaria.

PLAFONALIA is the name of a wide collection of decorative panels characterized by combining structures of high aesthetic and innovative value, assembled on electronic equipment with generous light efficiency.

We incorporate regulation systems and light temperature contrasts.

By means of a remote control, we manage these functions in a precise way with the possibility of memorizing the last state of the luminaire when it is switched off.

Natural System

Colecciones frescas de depuradas líneas que dan protagonismo a la naturaleza.

De tonos generalmente claros integramos estas colecciones en interiores minimalistas reservando algunos modelos en tonos oscuros para estancias que necesitan un cierto contraste.

Mostramos acabados en blanco y negro con o sin madera para luminarias de pared, techo o carril.

Fresh collections with refined lines that give prominence to nature.

Of generally light tones, we integrate these collections in minimalist interiors, reserving some models in dark tones for rooms that need a certain contrast.

We show black and white colors with or without wood for wall, ceiling or track luminaires.

Ventiladores

Fan & Light

FAN&LIGHT es la denominación que damos en JUERIC a nuestras colecciones de ventilación.

Como empresa especializada en desarrollo y fabricación de luminarias seguimos incorporando en nuestros ventiladores potentes fuentes de luz.

Hasta 76w de potencia lumínica y la posibilidad de memorizar la temperatura de color.

Una calidad mecánica de ventilación fabricada con ligeros motores DC de 6 velocidades y un ahorro energético del 70%. Modelos de aspas plegables en varios tamaños para adecuarnos con mayor precisión a espacios de hasta 25m². Funciones REVERSE que regeneran el aire caliente en invierno.

En definitiva una cuidada estética en este segmento de luminarias que incorporan las mejores prestaciones en ventilación para los 365 días del año.

FAN &LIGHT is the name we give at JUERIC to our ventilation collections.

As a company specialized in the development and manufacture of luminaires, we continue to incorporate powerful light sources into our fans.

Up to 76w of light power and the possibility of memorizing the color temperature.

A mechanical quality of ventilation made with light 6-speed DC motors and an energy saving of 70%. Models of folding blades in various sizes to adapt more precisely to spaces of up to 25m². REVERSE functions that regenerate hot air also in winter. We incorporate regulation system and light temperature contrasts.

By means of remote control we manage these functions in precise way with the possibility of memorizing the last state of the luminaire when it is switched off.

Technoled

Iluminación técnica

La **iluminación técnica** en el diseño de interiores es imprescindible para crear ese toque de confort y calidez en hogares y negocios.

Con la iluminación **LED** entramos en otra dimensión creativa permitiendo definir de una manera más natural cualquier propuesta decorativa.

Nuestra aportación pasa por dos sistemas **COMPACT SYSTEM** y **GU10 SYSTEM**.

El concepto que **JUERIC** quiere aportar a decoradores, arquitectos y en general a los diferentes profesionales de la creación y distribución de luminarias es la de poder integrar en cualquier ambiente un elemento con un carácter estético propio que no pretenda dominar la parte decorativa, pero si quedar integrada como una iluminación eficaz y un cierto carisma.

Los sistemas **GU10 SYSTEM** permiten de una manera deliberada flexibilizar el mantenimiento de estos elementos, así como posibilitar en un futuro la sustitución de una bombilla por una nueva generación de fuente de luz.

COMPACT SYSTEM define a una serie de colecciones de **DOWNLIGHT** y elementos que incorporan tecnología **LED** estática que en general incorporan una parte técnica con componentes de alta calidad y una iluminación de alto rendimiento lumínico.

Technical lighting

Technical lighting in interior design is essential to create that touch of comfort and warmth in homes and businesses.

With **LED** lighting we enter another creative dimension allowing any decorative proposal to be defined in a more natural way.

Our contribution goes through two systems: **COMPACT LED** and **GU10 SYSTEM**.

The concept that **JUERIC** wants to contribute to decorators, architects and, in general, to the different professionals in the creation and distribution of luminaires is to be able to integrate into any environment an element with its own aesthetic that does not pretend to dominate the decorative part, but remains integrated as effective lighting and a certain charisma.

GU10 SYSTEM systems deliberately make the maintenance of these elements more flexible, as well as making it possible in the future to replace a light bulb with a new generation of light source.

COMPACT LED defines a series of **DOWNLIGHT** collections that generally incorporate a technical part with high-quality components and high-performance lighting.

A modern interior scene featuring a dark wood wall, a track lighting system with three spotlights, and a marble countertop.

Iluminación decorativa

La importancia de la iluminación decorativa en interiores.

La iluminación decorativa es una pieza imprescindible en el diseño de cualquier espacio interior.

La buena elección de una luminaria ayudará a **potenciar y matizar los demás aspectos del ambiente**.

La iluminación en la composición de interiores determinará el poder de dar calidez a un espacio, resaltar zonas u objetos de mobiliario concretos y aportar sensación de confortabilidad a un hogar.

Dentro del concepto de iluminación interior podemos encontrar tres tipos de iluminación en diseño de interiores:

- **Iluminación global**, que proporciona luz general. Opción que suele incorporar más de una fuente de iluminación. Nuestra firma apuesta por luminarias generosas en lúmenes incorporando sistemas de regulación que se amoldan a cada momento del día a día.

- **Iluminación focal**, cuyo objetivo es iluminar puntos concretos por mediación de focos direccionales, ya sea en sistemas estables o a través de carriles electrificados.

- Por otro lado, los elementos de iluminación puntual se podrán usar para enfatizar ciertos aspectos de la decoración de cada espacio. Estos, juntamente con los elementos de iluminación globales más decorativos, aportarán **personalidad y originalidad a cada estancia**.

Esté catálogo de iluminación pretende aportar ideas funcionales e innovadoras.

Ideas prácticas para el diseño de interiores.

Decorative lighting

The importance of decorative lighting indoors:

Decorative lighting is an essential piece in the design of any interior space.

The good choice of a luminaire will help enhance the **other aspects of the environment**.

The lighting in the interior composition will determine the power of giving warmth to a space, highlighting areas or specific furniture objects and providing a feeling of comfort to a home.

Within the concept of interior lighting we can find three types of lighting in interior design:

- **Global illumination**, which provides general light. This option usually includes more than one light source. Our firm works with luminaires that are rich in lumens, they have incorporated a regulation system that adapts to every moment of the day.

- **Focal lighting**, whose objective is to illuminate specific points by means of directional lights, either in stable systems or through electrified rails.

- **Specific lighting** elements can be used to emphasize certain aspects of the decoration of each space. These, together with the most decorative global lighting elements, will bring **personality and originality to each room**.

This lighting catalog aims to provide functional and innovative ideas.

Practical ideas for interior design.

Fan & Light

Son múltiples las ventajas de este tipo de luminarias montadas sobre motores DC de última generación en ahorro energético.

Por mediación del mando a distancia marcaremos la velocidad de las aspas para ajustar el flujo del aire según corresponda, así como las diferentes funciones de luz.

Incorporamos una tecnología que crea una potente corriente de aire suave e ininterrumpida.

Son motores cuya principal característica es la insonoridad, sin vibraciones ni rozamientos.

Estos electrodomésticos no solo son funcionales en los meses de más calor, la peculiaridad de los motores REVERSE reside en las dos direcciones de giro, por lo que regeneran el aire caliente también en invierno.

Independientemente mantenemos nuestro compromiso por la iluminación LED de bajo consumo, pero con un aporte lumínico intenso en tres temperaturas de luz.

Nuestras luminarias tienen el valor añadido de ser programables en su tipo de luz.

Por supuesto aportamos unos modelos con el valor estético que caracteriza a nuestra marca.

There are multiple advantages to these type of luminaires assembled on last generation DC motors in energy saving.

Through the remote control we will mark the speed of the blades to adjust the air flow accordingly, as well as the different light functions.

We incorporate technology that creates a powerful, smooth, uninterrupted stream of air.

They are engines whose main characteristic is soundproofing, without vibrations or friction.

These appliances are not only functional in the hottest months, the peculiarity of the REVERSE motors lies in the twofold rotation, which is why they regenerate hot air in winter as well.

Regardless, we maintain our commitment to low consumption LED lighting, but with an intense light contribution in three light temperatures.

Our luminaires have the added value of being programmable in their type of light.

We of course provide models with the aesthetic value that characterizes our brand.

365 DÍAS FUNCIÓN VERANO / INVIERNO

Tanto por su potencia lumínica como a las dos direcciones de giro de sus aspas, estos modelos son funcionales durante todo el año.

365 DAYS SUMMER / WINTER FUNCTION

Both due to their light output and the two directions of rotation of their blades, these models are functional throughout the whole year.

MOTORES DC

Incorporamos motores de bajo consumo y baja sonoridad, convirtiéndolos en aparatos de mayor durabilidad.

DC MOTORS

We incorporate low-consumption and low-noise motors, making them more durable devices.

DOBLE DIRECCIÓN DE GIRO (FUNCIÓN REVERSE)

El cambio de dirección de las aspas hace más efectiva la ventilación cálida también en invierno. Absorbiendo el calor de las calefacciones para distribuirlo uniformemente.

DOUBLE ROTATION DIRECTION (REVERSE FUNCTION)

The change of the blade's direction makes the warm ventilation more effective in winter as well. Absorbing heat from heaters to distribute it evenly.

HASTA SEIS VELOCIDADES

Las ventajas de funcionar a seis velocidades residen en poder graduar desde una marcha lenta que crea una pequeña brisa a pasar gradualmente a una intensa y eficaz ventilación.

UP TO SIX SPEEDS

The advantages of operating at six speeds lie in being able to graduate from a slow gear that creates a slight breeze to a gradual transition to intense and efficient ventilation.

MEMORIA DE
TEMPERATURA

MEMORIA DE TEMPERATURA

Grabación de la temperatura de apagado

TEMPERATURE MEMORY

Memorization of the shutdown temperature.

MANDO A DISTANCIA

Gestión de la iluminación, regulando la intensidad de las diferentes velocidades del ventilador así como la dirección de las aspas.

REMOTE CONTROL

Lighting management, regulating the intensity of the different fan speeds as well as the direction of the blades.

ALTA LUMINOSIDAD

Siendo fieles a un catálogo de luminarias incorporamos en las series de ventilación intensas fuentes de luz. Hasta 5040 lúmenes y tres temperaturas de color 3000-4000-6000°k.

HIGH BRIGHTNESS

Being faithful to a catalog of luminaires, we incorporate intense light sources into the ventilation series. Up to 5040 lumens and three color temperatures 3000-4000-6000°k.

RGB

Modelos con conectividad BLUETOOTH que gestiona los diferentes colores RGB. Son modelos que incorporan altavoz.

RGB

Models with BLUETOOTH connectivity that manages the different RGB colors. They are models that incorporate a speaker.

KIT LUMINARIAS LED (IMANTADO)

Placas imantadas de gran potencia para la sustitución en luminarias de techo o pared. Validas para lámparas con preinstalaciones led, incandescencia o halógena. Cambio de temperatura por mediación del ON-OFF de su interruptor de pared. Memoriza la temperatura (a partir de 20seg. de su apagado)

Mando a distancia opcional para la gestión de todas las funciones de la placa, incluyendo la regulación de luz.

High-power magnetic plates for the replacement of ceiling or wall luminaires. Valid for lamps with led, incandescent or halogen installations. Temperature change through ON-OFF on your wall switch. Memorize the temperature from 20 seconds after power off.

Optional remote control for managing all the panel functions, including light regulation.

CONDICIONES GENERALES DE VENTA

Los pedidos deberán cursarse por escrito, vía correo electrónico (pedidos@juericinvest.es) o mediante nuestro Agente Comercial de la zona.

PRECIOS

Los precios de venta de los productos Jueric Invest S.L son los indicados en la tarifa oficial en vigor, los cuales no incluye impuestos , que serán a cargo del comprador, así como cualquier otra tasa o impuesto que grave la venta. Los precios que se expresan en la tarifa pueden ser modificados sin previo aviso por parte de Jueric Invest S.L.

PLAZOS DE ENTREGA

Los plazos de entrega se consideran siempre aproximados y no podrá exigirse responsabilidad alguna a causa de retrasos por fuerza mayor u otras circunstancias propias ajenas a la voluntad de Jueric Invest S.L, no dando derecho al comprador e indemnizaciones ni anulaciones en los pagos de los pedidos realizados.

TRANSPORTE

Península: Las entregas a portes pagados corresponden a pedidos superiores a 300€ exento de impuestos, para pedidos inferiores a este importe se cobrarán en la factura correspondiente al pedido.

Andorra y Baleares: Las entregas a portes pagados corresponden a pedidos superiores a 500€ exento de impuestos, para pedidos inferiores a este importe se cobrarán en la factura correspondiente al pedido.

Islas Canarias: Condiciones a consultar.

RECLAMACIONES

Como consecuencia del transporte, se aceptaran en un plazo de 24h siguientes a la recepción de la mercancía, acompañado de fotocopia del albarán de la agencia de transporte en el que constará la incidencia de rotura, mal estado etc.

DEVOLUCIONES

No se aceptarán devoluciones en los siguientes casos:
-Artículos que hayan sido usados o manipulados.

CONDICIONES Y FORMAS DE PAGO

Los pagos se realizarán según lo acordado con Jueric Invest S.L. En caso de demora en los pagos, se cargará al comprador los intereses correspondientes, así como cualquier gasto de renovación, aplazamiento o impago, si lo hubiese.

Descuento pronto pago: 2%

Pedidos inferiores a 50€ se deberán abonar en un plazo máximo de 10 días.

Pedidos inferiores a 100€ se deberán abonar en un plazo máximo de 30 días.

Jueric Invest S.L se reserva el derecho a suspender cualquier envío de material por el impago parcial o total de algún suministro anterior.

JURISDICCIÓN

Para toda cuestión, diferencia, interpretación, etc.
